PROSPECTUS.

PROSPECTUS.

This Company is formed (1) for the purpose of raising and fattening cattle, &c. (by the aid of irrigation paddocks), for the Brisbane and other Australian markets; (2) for the purpose of purchasing 299 acres of land, portions 19, 20, and 21, Wellington Point, Cleveland, near Brisbane, containing a large body of permanent water, suitable for irrigation and other purposes of the Company; (3) for the purpose of leasing, renting, or purchasing land in the district suitable for grazing stock.

The raising and fattening of cattle, as is well known, is one of the most profitable and reliable of colonial industries. The district of Cleveland being within twenty miles of the city of Brisbane, and still nearer to the port, has all the advantages of easy access to a large and reliable market.

There are in the Cleveland district very large areas of excellent pasture lands held mainly by non-resident owners in prospect of increased future values. Many thousands of acres of these lands are at present lying idle and unimproved, and as it is well known that to put stock upon them will benefit the land by keeping down the undergrowth, sweetening the grass, &c., it has been found possible to secure some thousands of acres at a merely nominal rental.

For fattening cattle and other stock for market it is proposed to lay down from 50 to 100 acres of the land to be purchased in irrigation paddocks, the cost of working which will, to some extent, be lessened from the fact that the Government have already erected pumping plant at Hilliard's Creek, in a most suitable place for the purpose of the company, which they have agreed to lease at a trifling cost (£10 per annum) to the Company.

The fifty odd acres which it is proposed to irrigate is composed of rich chocolate soil; it slopes gently to the water, and is admirably suited for irrigation purposes. By this means it is estimated that at least 2000 head of cattle may be annually fattened for market, realising at least £5000 per thousand.

The land is adjacent to the growing townships of Cleveland and Wellington Point, is within easy access of three railway stations, and by road is only eighteen miles from Brisbane. It is under offer to the Company at £25 per acre, but has been recently valued by the Cleveland Divisional Board's valuator at £45 per acre, and must rapidly advance in value as population increases. The nearest Railway Station (Ormiston), is within fifteen minutes' walk of the land.

The nearness to the Brisbane markets must prove of great advantage to the Company, in saving both expense of droving and loss of weight and condition. Cattle taken straight from the Company's fattening paddocks, and thus in the very pink of condition, will certainly command the highest market prices.

The great area of grazing land, thus available so near to the capital of Queensland, is a unique feature of this district. Thousands of acres are held by absentee owners in prospect of increased

held by absentee owners in prospect of increased values, enabling the Company to carry on its operations at a nominal cost for rent of land in the very precincts of the largest markets of the colony. The added value for growth in cattle each twelve months will not be less than 20s. per head, while the increase of cattle by calving may be calculated at 60 per cent.

It should be noted, too, that the assets of the company will mainly consist of land and cattle—assets always realisable, that no bad debts can be made, as all transactions will be for cash. And further, that labour difficulties can never arise to impede the operations of the Company and lessen the profits, as the Directors will be able to carry on the whole business with a competent working Superintendent and two or three men.
